4 The morning check-in

15 seconds that shape your child's school day

5 The afternoon update

Hearing how the day actually went

6 Logging incidents

The ABC log, explained simply

7 Connecting your team

Schools, clinicians, and staying in control

8 Help & Support

Quick fixes, FAQs, and how to reach us

Getting started

Setting up takes a few minutes. Here's exactly what to expect, screen by screen.

Create your account

Tap Register and fill in your name, email, and a password. That's all we need to get started — no credit card, no faff.

Check your inbox for an 8-digit code and pop it in. If it doesn't arrive within a minute or two, check your spam folder, or tap "Resend code."

Tell us who you are

Next, you'll choose your role. As a parent or carer, this unlocks the passport-building flow designed just for you.

Who are you?

Your role determines what you can see and do on the platform.

Parent or carer

Building a passport for my child

Class teacher

Supporting children in school

Clinician

BCBA, psychologist, OT, SLT or GP

Continue

Choose "Parent or carer"

Your data, your rules

You own your child's data

Data belongs entirely to you. Export or delete at any time.

You control who sees it

No school sees anything without your active consent.

GDPR compliant

Registered with the Data Protection Commission.

☐ I agree to Behaviour Hive storing and processing my child's data. **Required**

☐ I'd like to receive tips and updates by email.

Accept and continue

Agree to how your data is used

● YOU CONTROL ALL ACCESS

Nothing about your child is ever visible to anyone — not a school, not a clinician — until you actively approve it. You can see exactly who has access at any time, and remove it whenever you choose. More on this in Chapter 7.

Building your child's passport

The passport is the heart of the app — a single, living picture of your child that travels with them between home, school, and any clinicians you connect. It takes about ten minutes to build, and you can always come back and change it later.

Four short sections

We ask about your child in four parts. None of it is compulsory beyond the basics — fill in what feels useful, skip what doesn't.

About Your Child

Section 1 of 411%

Child's name

Jack Walshe

Date of birth

02/05/2019

School

Elmwood National School

Important people in my life

Mum, Dad, Gran, Ms. O'Brien

Diagnosis

ADHD (Attention Deficit Hyperactivity Disorder)

Anxiety

ASD (Autism Spectrum Disorder)

Apraxia

Autism

DLD (Developmental Language Disorder)

DMDD (Disruptive Mood Dysregulation Disorder)

1. About your child

Diagnoses, school, key people

How my child shows they are okay

Section 2 of 4 · Step 1 of 322%

4. Support strategies

What helps, before, during and after

Everything **auto-saves** as you go. Close the app mid-section and pick up right where you left off — nothing is lost.

Not finished yet? Your home screen always shows a "Resume passport creation" card, so you're never hunting for where you left off.

Your finished dossier

Once complete, your child's passport becomes a beautifully organised profile you can open, read, and share at any time — we call it the Digital Dossier.

HOW ALFIE BYRNE SHOWS THEY ARE HAPPY

He gets very chatty and starts telling long, detailed stories — usually about dinosaurs or his dog Buddy. He'll often want a high-five.

HOW ALFIE BYRNE SHOWS THEY ARE ANXIOUS

He goes quiet and starts repeating the same question over and over. Sometimes he'll cover his ears even if there isn't loud noise.

PHRASES TO AVOID

"Calm down" and "you're overreacting" — he responds much better to being asked what he needs.

Your home screen explained

Everything you need day-to-day lives on one screen. Here's what each part does.

Your home screen: greeting, daily card, passport status, recent activity, quick actions, and your team — all in one place

The daily card, in all four states

The card near the top of your screen changes through the day, always showing you the single most useful thing right now.

1. Morning, not checked in
A gentle prompt to check in

2. Morning, checked in
Confirmation it reached the teacher

3. Afternoon, waiting
Your teacher's update hasn't landed yet

4. Afternoon, update arrived
How the day actually went

Recent Activity

A running log of everything that's happened on your child's passport — check-ins sent, updates received, incidents logged, and anyone who's connected.

The Recent Activity card on your home screen

Tap "View all activity" for the full history

Quick actions

Four shortcuts sit below the daily card, for the things you'll reach for most.

View Passport and ABC Log are fully live today. Resources and Messages are still being built — they're on the way, but not functional yet.

Your Team

A quick-glance list of every school and clinician currently connected to your child's passport, with more detail available from the Manage Access screen (Chapter 7).

Your Team, showing everyone with current access

The morning check-in

15 seconds that shape your child's school day. A rough night's sleep or a rushed breakfast can completely change how a child copes by 10am — and until now, teachers had no way of knowing. This one small habit changes that.

Before 1pm each day, your home screen invites you to check in with one tap.

Tap "Check in now" to start

Four quick taps and you're done.

Step 1 of 4
Alfie Byrne

How did Alfie Byrne sleep last night?

 Slept through / Well rested

 Woke up briefly

 Very restless / Up multiple times

 Barely slept

1. Sleep

How did they sleep last night?

Step 2 of 4
Alfie Byrne

How settled is Alfie Byrne right now?

 Settled and Calm

 A bit unsettled / Anxious

 Highly dysregulated / Upset

2. Right now

How settled are they this morning?

Step 3 of 4
Alfie Byrne

Did anything disrupt the morning routine?

Tap all that apply, or tap No disruptions for a smooth morning.

Didn't eat breakfast

Rushed / Running late

Refused uniform / Sensory issue

Missed medication

Family friction / Argument

Tired / Groggy

No disruptions (Smooth morning)

Continue

3. Disruptions

Anything unusual happen before school?

Step 4 of 4
Alfie Byrne

Anything else the teacher should know today?

Optional — e.g. Grandma is doing pick-up today, or hamster died last night.

Send to teacher

4. Anything else

An optional note for the teacher

Tap send, and it's on its way — no typing required unless you want to add a note.

What your teacher sees

Your check-in feeds straight into your child's teacher's morning view, helping them plan the day with real information instead of guesswork.

What your teacher sees: every checked-in child at a glance, colour-coded so nothing gets missed

The afternoon update

Once school finishes, your child's teacher can send back a short update on how the day actually went — so you're never walking into pick-up blind.

An afternoon update: how settled they were, their energy level, any flags, and a note from the teacher

What the colours mean

The badge at the top of the update uses three simple colours, so you can tell how the day went before reading a single word.

- **Green — Settled and Regulated.** A good day, nothing to flag.
- **Amber — Unsettled and Anxious.** A trickier day; worth a gentle check-in at home.
- **Red — Highly Dysregulated.** A hard day. Your teacher's note will usually explain what happened.

Below the badge, you'll also see an energy level (how tired or wired they seemed) and any flags the teacher noticed — plus a free-text note whenever they've added one.

Logging incidents

Sometimes things happen — a meltdown at a birthday party, a hard moment at bedtime. Writing it down while it's fresh helps everyone around your child spot patterns over time, at home and at school.

We call this an **ABC log**, short for Antecedent, Behaviour, Consequence — three simple questions: what happened just before, what your child did, and what happened right after. That's it. No clinical training needed.

THE BEHAVIOURAL PASSPORT OF

Alfie Byrne

Log an Incident

For Alfie Byrne

Step 1 of 4

THE BEHAVIOURAL PASSPORT OF

Alfie Byrne

Log an Incident

For Alfie Byrne

Step 2 of 4

What happened right before?

Think about what was going on right before the behaviour started.

Asked them to do something

Change of plan

Told them no

Too loud or busy

Other

Back

Next

Start with when it happened and how intense it felt

Then walk through what happened right before

You can start a log from the "ABC Log" quick action on your home screen, or directly from your child's passport. Every log you save appears in the Incident Timeline on the Digital Dossier, alongside anything logged by a teacher or connected clinician — so everyone sees the same picture.

Connecting your team

Your child's passport becomes far more useful once it's shared with the people supporting them — but you decide exactly who, and you can change your mind at any time.

Sharing with a school

Open the share icon on your child's Digital Dossier. You'll see your child's own passport code — give this to their class teacher. Separately, enter your school's institution code (get this from the school) to approve the school itself.

Your passport code, plus fields to approve a school and connect a clinician

Until you approve your child's school, a teacher can see only a **shortened name** — first name and last initial. This is deliberate: full details unlock only once you've actively said yes.

THE BEHAVIOURAL PASSPORT OF

Alfie Byrne

8 years old • Elmwood National School

Share Alfie Byrne's Passport

Your child's passport code

ALF-3377

Copy Code

Share this code with your child's class teacher. They will enter it in the app to access Alfie Byrne's classroom profile.

Enter your school's institution code

e.g. BHPS0000

Greenfield National School has been approved to access Alfie Byrne's passport.

Approve school access

Enter your clinician's code

e.g. CL-4821

Connect clinician

Approving a school by its institution code

Connecting a clinician

If your child works with a psychologist, therapist, or other clinician using The Behaviour Hive, enter their clinician code in the same share screen to connect them.

Manage Access

Scroll down on the Digital Dossier to see exactly who has access — every approved school and every connected clinician, in one list.

Manage Access: every school and clinician currently connected

Revoking access

Changed your mind, or a connection is no longer needed? Tap "Revoke Access" next to any school or clinician, at any time. It takes effect immediately.

A Revoke Access button sits beside every school and clinician

Help & Support

Most hiccups have a quick fix. Here's where to start, and how to reach us for everything else.

Quick fixes first

The app looks out of date or something isn't loading

Close the app fully — swipe up from the bottom and swipe the app away — then reopen it from the icon.

I'm stuck on a spinning or loading screen

Check your internet connection, then force-close and reopen the app.

I forgot my password

Tap "Forgot password?" on the login screen and follow the link we email you.

The app is showing a screen I can't get out of

Close and reopen the app. If it keeps happening, note which screen it was and contact us below.

I didn't get my sign-up code email

Check your spam or junk folder first — the sender is info@thebehaviourhive.com.

Common questions

The teacher says my code isn't working.

Double-check they're entering your child's passport code (not your school's institution code) — and that you've also separately approved your school in the share screen. Both steps are needed.

How do I stop a school or clinician seeing the passport?

Open the Digital Dossier, scroll to Manage Access, and tap "Revoke Access" beside them. It's immediate, and fully reversible — you can reconnect later with a fresh code if you choose to.

Can I use the app for more than one child?

Each parent account currently supports one child's passport. If you need a second, get in touch and we'll help.

● WHEN YOU CONTACT US

Please include: which screen you were on, what you tapped, what you expected to happen, what happened instead, and your phone type. This one detail alone usually helps us fix things in a fraction of the time.

Still stuck?

For technical help, contact daniel@thebehaviourhive.com

Thank you for being part of our trial programme. Every note you send, every question you ask — it all goes directly into making this better for the next family who needs it.
