

THE BEHAVIOUR HIVE

Teacher Guide

**Know how every child arrived — before the
bell rings.**

Trial Programme Edition

For technical help, contact daniel@thebehaviourhive.com

Contents

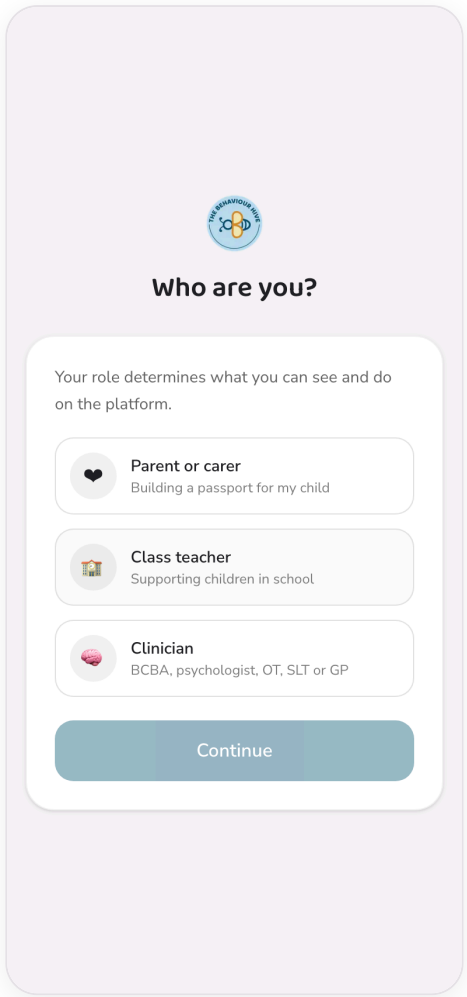

1	Getting started	Linking your first pupil
2	Your dashboard	Stats, the morning grid, and colour-coded classrooms
3	A child's passport	What you can see, and what stays private
4	The end-of-day update	Closing the loop for waiting parents
5	Logging incidents	The ABC log, from your side
6	Your students page	Your whole class, searchable
7	Help & Support	Quick fixes, FAQs, and how to reach us

Getting started

Setting up as a class teacher takes a couple of minutes, and linking your first pupil is even quicker.

Choose your role

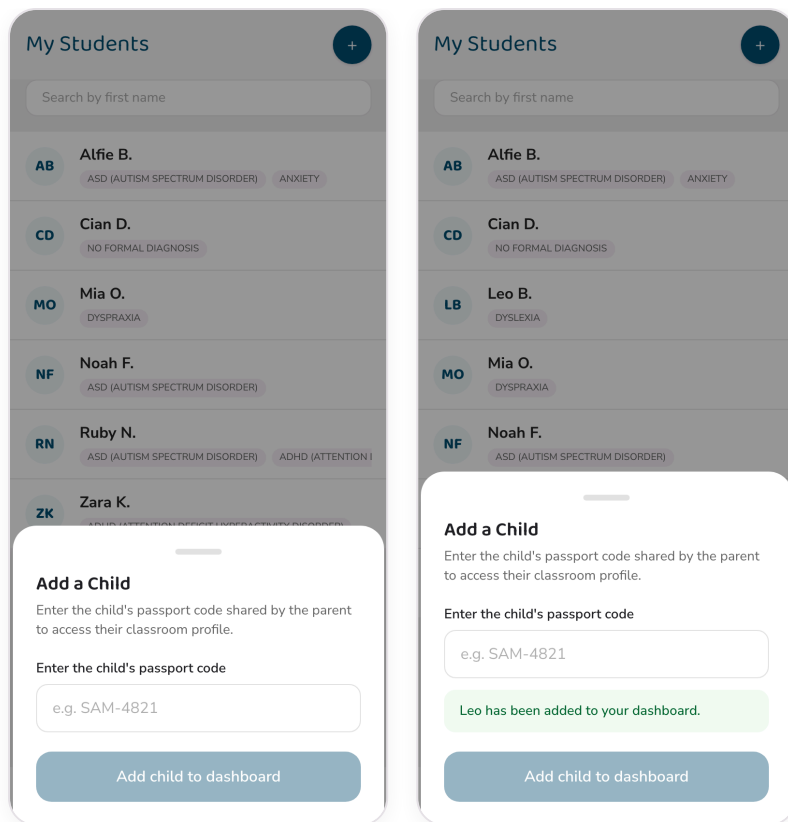

After registering, select "Class teacher" from the role screen. You'll then be asked for your school's institution code — get this from your school administrator.

Choose "Class teacher" on the role screen

Adding your first pupil

From your Students page, tap the + button and enter the child's passport code — the parent gets this from their own app and shares it with you directly.

Enter the child's passport code

Added straight away

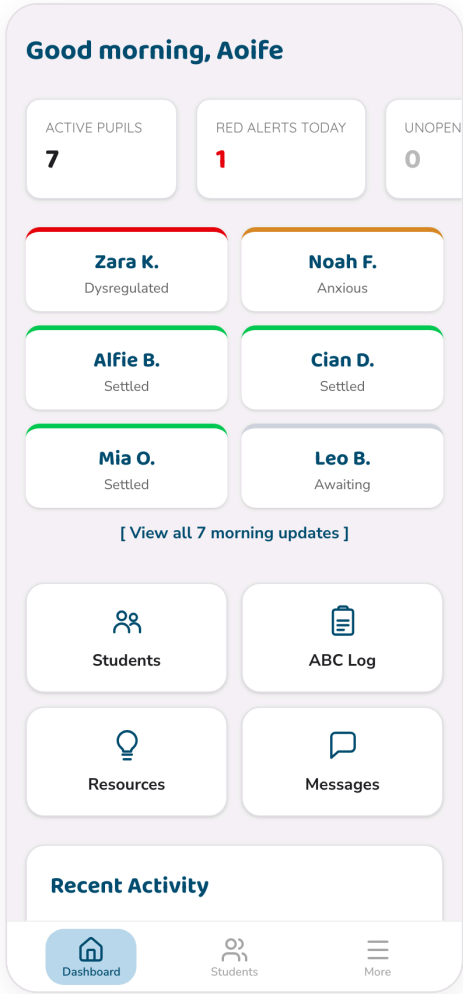

The pupil only appears once the parent has also approved your school separately. If a code doesn't work yet, it usually just means that step is still pending on the parent's side.

● YOU'LL SEE A SHORTENED NAME AT FIRST

Until a parent has approved your school, and always by design, you see only a first name and last initial — never a full surname. This protects a child's identity while access is still being established. It's not a bug, and it's not something you need to chase.

Your dashboard

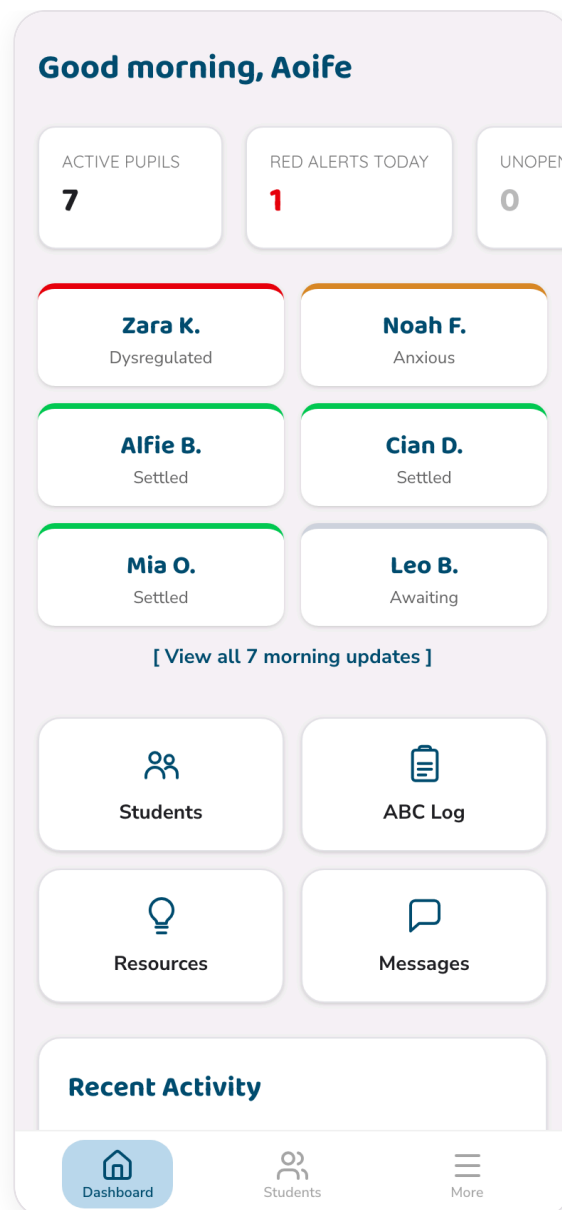

Everything you need before the school day starts, on one screen.

Your dashboard: stats, the morning grid, and quick actions

Your stats, at a glance

Three numbers greet you every morning: how many pupils are active, how many red alerts came in today, and how many messages are unread.

Active pupils, red alerts, and unread messages

The morning grid

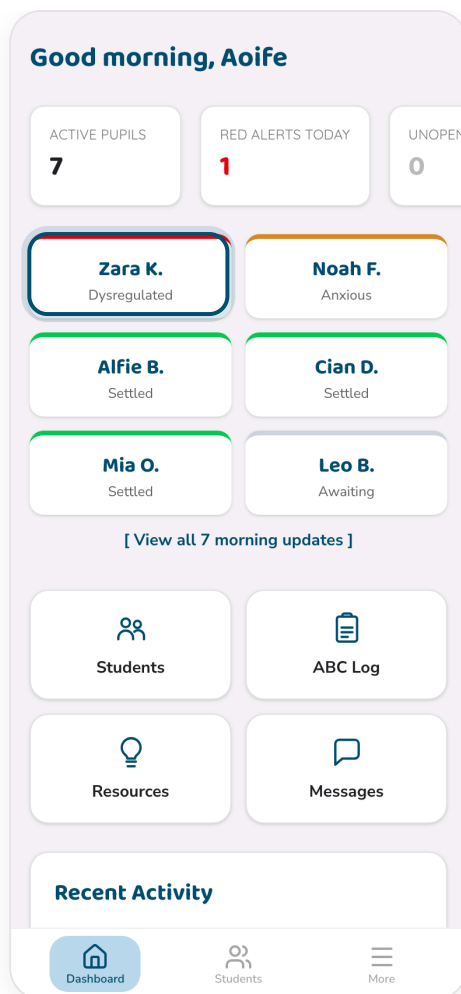

Every pupil who's checked in appears as a coloured card, sorted red first so the children who need you most are never buried at the bottom.

Red — Dysregulated. Tap the card for the full detail.

Amber — Anxious. Also tappable for more detail.

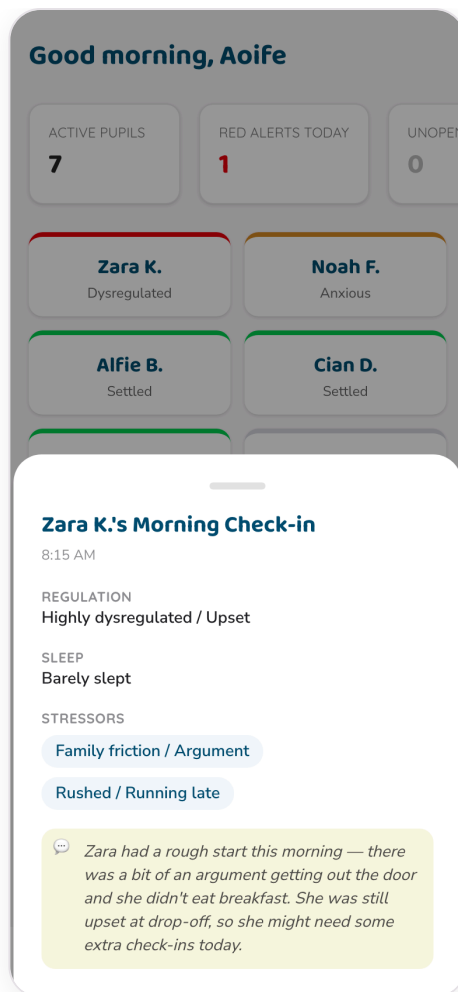

Green — Settled. A good start to the day.

Grey — Awaiting. No check-in received yet.

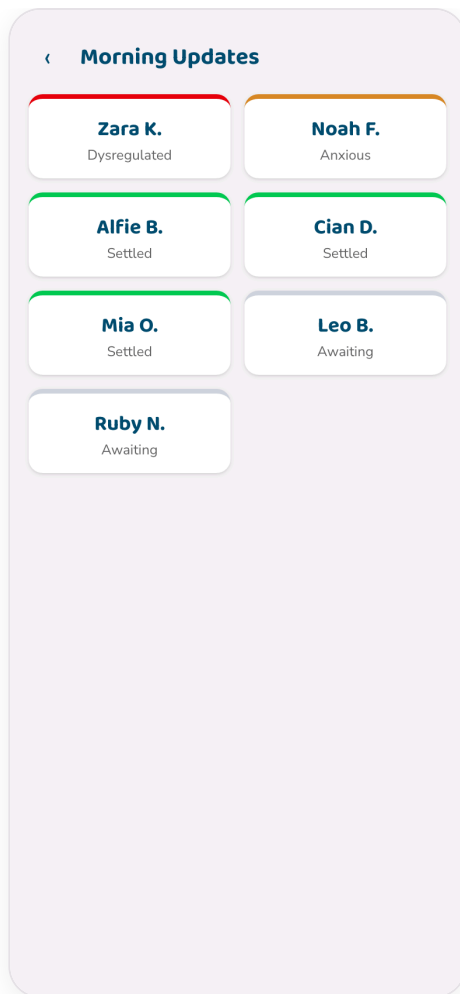

Red cards are sorted first — tap one to see the full detail

Tap a red or amber card to see exactly what the parent reported — sleep, regulation, any disruptions, and their note.

A red card's detail, including the parent's heads-up note

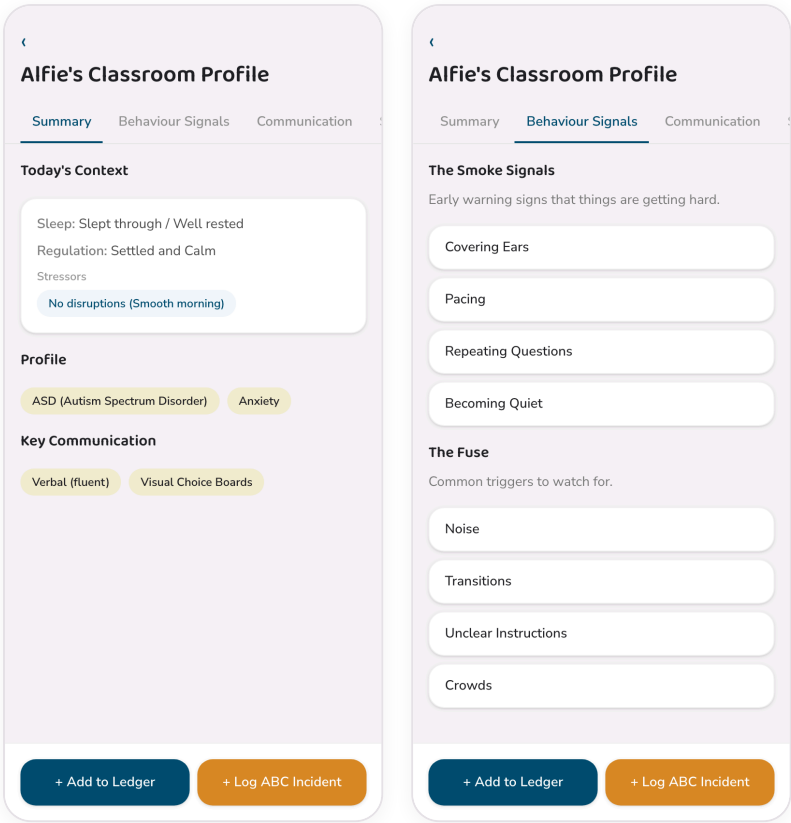

Got a bigger class? "View all morning updates" shows the full list, not just the highlights.

The full morning updates list

A child's passport

Tap any pupil to open their Classroom Profile — everything a parent has chosen to share with their school, organised into tabs.

Summary tab

Behaviour Signals: "The Smoke Signals" and "The Fuse"

"The Smoke Signals" are the early warning signs that things are getting hard — worth watching for before things escalate. "The Fuse" lists common triggers to keep in mind. Further tabs cover communication style and the specific strategies that help before, during, and after distress.

● WHAT YOU WON'T SEE

Clinical notes added by a connected clinician are never visible to you, by design. You see everything a parent has chosen to share for the classroom — nothing more, nothing clinical.

The strategy ledger

A running log of wins, observations, and updates you and colleagues log against a pupil — useful for spotting what's actually working over time.

Adding a new strategy ledger entry

The end-of-day update

The parent is waiting to know how today went. A two-minute update from you closes that loop, every single day.

Step 1 of 4

Noah

How is Noah doing right now?

Green

Settled and Regulated

Amber

Unsettled and Anxious

Red

Highly Dysregulated

Step 2 of 4

Noah

Energy level today

1

2

3

4

5

Step 3 of 4

Noah

Any flags noticed today?

Routine Disruption

Peer Friction

Demand Avoidance

High Anxiety

Food Refusal

Fatigued

No flags today

Continue

1. How were they?

Settled, unsettled, or dysregulated
2. Energy level

A quick 1–5 scale
3. Any flags?

Tap all that apply, or none at all

Step 4 of 4
Noah

Anything the parent should know before pick-up?

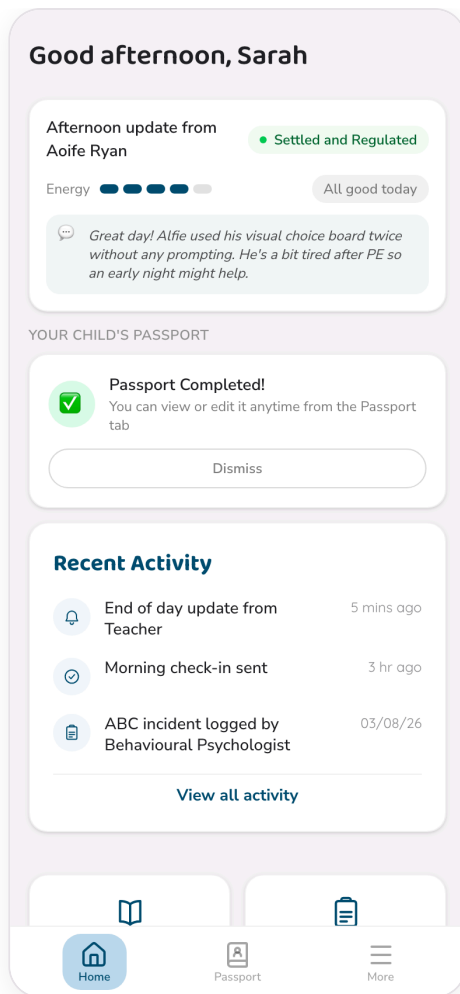

Optional — anything the parent should know before pick-up? e.g. Fire alarm went off at 1pm, he recovered well but might need a quiet evening.

Submit Update

4. A note for home

Optional, but often the most valued part

Submit, and it lands directly on the parent's home screen — no phone call, no note stuffed in a schoolbag.

What the parent sees the moment you submit

Logging incidents

When something happens worth recording, the ABC log gives you a fast, structured way to capture it — Antecedent, Behaviour, Consequence: what happened just before, what the child did, and what happened right after.

From the ABC Log quick action, choose the pupil first.

Add Log

SELECT A STUDENT TO LOG AGAINST

Cian D.

Ruby N.

Alfie B.

Noah F.

Leo B.

Mia O.

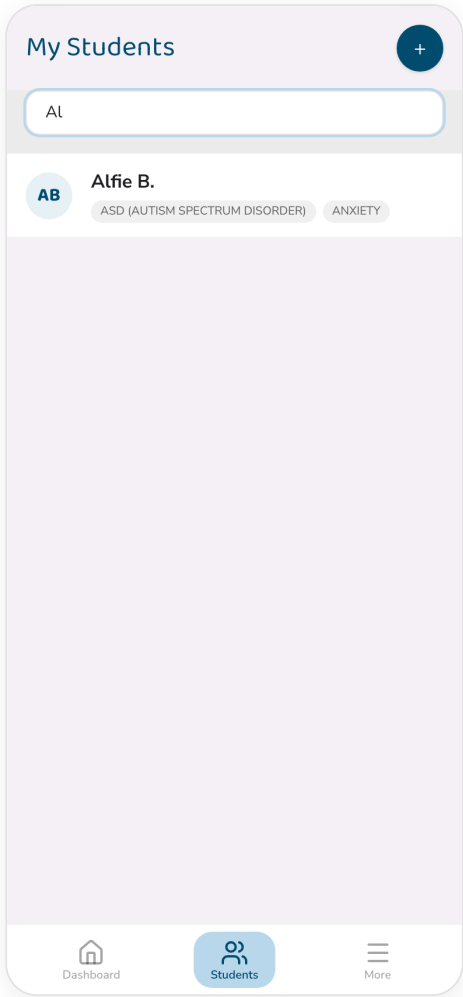

Zara K.

Choosing which pupil the log is for

Every log you save is visible to the child's parent and to any connected clinician on the Incident Timeline — building one shared, accurate record instead of three separate ones.

Your students page

Every pupil you're connected to, in one searchable list — with their diagnoses visible as quick-reference tags.

Searching by first name

Tap the + button at any time to add another pupil using their passport code, exactly as covered in Chapter 1.

Help & Support

Most hiccups have a quick fix. Here's where to start, and how to reach us for everything else.

Quick fixes first

The app looks out of date or something isn't loading

Close the app fully — swipe up from the bottom and swipe the app away — then reopen it from the icon.

I'm stuck on a spinning or loading screen

Check your internet connection, then force-close and reopen the app.

I forgot my password

Tap "Forgot password?" on the login screen and follow the link we email you.

The app is showing a screen I can't get out of

Close and reopen the app. If it keeps happening, note which screen it was and contact us below.

I didn't get my sign-up code email

Check your spam or junk folder first — the sender is info@thebehaviourhive.com.

Common questions

A child I re-added isn't appearing on my dashboard.

Check with the parent that their school approval is still active — a parent can revoke it at any time, which quietly removes a pupil from your list until they reconnect.

Why can I only see a shortened name for some pupils?

That's expected until the parent approves your school (Chapter 1) — it's a deliberate privacy step, not a fault.

Can I submit an end-of-day update twice in one day?

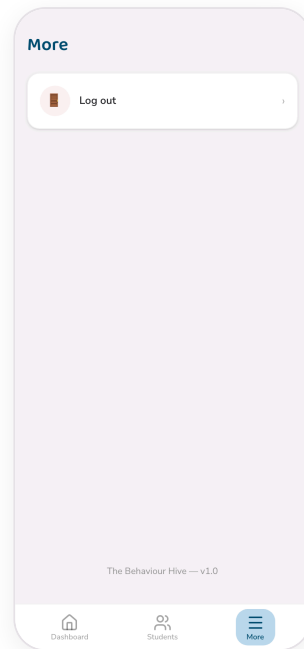

Yes — if you submit again, we'll ask you to confirm, since it replaces your earlier update rather than adding a second one.

● WHEN YOU CONTACT US

Please include: which screen you were on, what you tapped, what you expected to happen, what happened instead, and your phone type. This one detail alone usually helps us fix things in a fraction of the time.

Still stuck?

For technical help, contact daniel@thebehaviourhive.com

Thank you for being part of our trial programme. Every note you send, every question you ask — it all goes directly into making this better for the next classroom that needs it.
